requestIdleCallback

Schedule non important tasks when CPU is Idle

```
requestIdleCallback(
                    myNonImportantTask,
                    { timeout: 2000 }
            );
```

RESPONSE

Goal: The input latency from tap to paint is short.

＊ Respond in under <100 ms* to feel instant.

Delay	User reaction
0 - 100 ms	Instant
100 - 300 ms	Slight perceptible delay
300 - 1000 ms	Task focus, perceptible delay
1000+ ms	Mental context switch
10,000+ ms+	I'll come back later...
